https://carlosoliver.co

SUMMARY

My expertise and interests span all aspects surrounding the question of understanding biomolecular structure & function. As a computer scientist, I approach this problem by combining machine learning and graph algorithms. Since my PhD, I have completed projects in a wide range of topics from *drug discovery*, *structure prediction*, and *pattern mining*.

WORK EXPERIENCE

Postdoctoral Researcher — October 2021 - Present
ETH Zürich — *full-time*
Basel, Switzerland

- **Department**: Machine Learning and Computational Biology Group, Department of Biosystems Science and Engineering
- **Advisor**: Karsten Borgwardt
- Researching graph machine learning methods and their applications to biological problems

Technical Advisor — May 2022 - Present
Simmunome Inc. — *remote, part-time*
Montreal, Canada

- Advisory board member for biotech startup focusing on disease modeling and drug discovery.

Consultant & Co-Founder — January 2019 - Present
Ozeki Inc. — *remote, part-time*
Montreal, Canada

- Consultancy service for startups; specializing in AI and blockchain implementations and advising.

Lead Scientist in Residence — March 2020 - August 2021
NextAI — *part-time*
Montreal, QC, Canada

- Supporting incubator startups in multiple industries with technical planning, troubleshooting, hiring and education.

Expert AI Advisor — *May 2021 - October 2021*
Creative Destruction Labs — *remote, part-time*
Toronto, ON, Canada

- Conducted interviews with startup founders to select incubator cohort.
- Assessed startups on technical soundness and potential.

Expert AI Advisor — August 2020 - July 2021
Québec Ministry of Immigration — *remote, part-time*
Montreal, QC, Canada

- Evaluating Québec residence applications with respect to artificial intelligence proficiency.

Course Lecturer — September 2018-2019

School of Computer Science, McGill University *part-time*
Montreal, Canada

- Taught and prepared learning material for undergraduate and graduate-level computer science courses ($>$ 600 students). Topics: 'Introduction to Computer Science', and 'Fundamentals of Programming for Biology'

EDUCATION

PhD - Computer Science
McGill U. & Montreal Institute for Learning Algorithms (MILA)
Montreal, Canada 2016-2021

- **Advisor(s):** Jerome Waldispuhl, William L. Hamilton
- **Thesis:** Origins, structure, and patterns of complex RNA structures.
- **Research Areas:** Computational Biology, Machine Learning on Graphs, Representation Learning, Network Science, Drug Discovery

M.Sc - Molecular Biology
McGill U.
Montreal, Canada 2014-2016

- **Advisor(s):** Jackie Vogel
- **Thesis:** Molecular Dynamics of the γ-Tubulin C-Terminal Tail
- **Research Areas:** Molecular Dynamics, Intrinsically Disordered Proteins, Systems Biology

B.Sc - Computer Science & Biology
McGill U.
Montreal, Canada 2010-2014

- **Minor:** Italian Studies

RESEARCH HIGHLIGHTS

Fuzzy Network Motif Mining

- Fully automated tool for mining quasi-isomorphic and frequent network motifs in biological data.
- Integrates concepts from graph kernel methods, unsupervised graph representation learning, and exact graph algorithms (See [4] in Publications section)
- Source Code: `https://github.com/cgoliver/vernal`
- Motif Gallery: `http://vernal.cs.mcgill.ca`

Automated Drug Discovery for RNA

- First learning platform for target-based drug discovery on RNA molecules.
- Graph representation learning and kernel methods revealed insights for understanding key interactions in biomolecules (See [8] in Publications).
- Source Code: `https://github.com/cgoliver/vernal`
- Webserver: `http://rnamigos.cs.mcgill.ca`

AWARDS

2017	FRQNT Doctoral Fellowship	$60k
2017	John D. Thompson TechIdea Pitch Competition	3rd Place
2016	Graduate Excellence Award	$10k
2014	Cellular Dynamics Graduate Fellowship	$35k
2014	Dean's Multidisciplinary Undergraduate Researcher List	

INVITED & REFEREED TALKS

- *Deep Graph Learning Library Developer Group* Virtual (Invited Talk)
- *RECOMB 2021* Virtual (Oral Presentation for [4])
- *RNA Society Meeting 2020 Online* Vancouver, Canada (Selected Talk)
- *Machine Learning in Drug Discovery 2018,* University of Leuven, Belgium (Selected Talk)
- *RiboClub Meeting 2018*, Sherbrooke, Candada (Selected Talk)
- *Computational Approaches to RNA Structure and Function*, Benasque, Spain 2018 (Invited Speaker)

OPEN SOURCE CONTRIBUTIONS

- GitHub: `https://github.com/cgoliver/`
- `torch-pdb`: co-creator and developer of largest deep learning-ready protein structure database; including newly published AlphaFold datasets.
- NetworkX (+ 4k users) graph comparison algorithms (WL-isomorphism, and Graph Edit Distance).
- Neural Subgraph Learning Library(+ 4k users) minor code enhancements.
